EXECUTIVE SUMMARY

Experienced technical program manager and operations executive adaptable from startups to the MAG7.

PRODUCT & STRATEGY	DATA & SYSTEMS	TECHNICAL FLUENCY
- Quarterly & sprint planning - Product roadmap & prioritization - OKR KPI design & SLA ITSM - Cross-functional alignment & delivery, stakeholder management - Agile/SCRUM, Jira, Confluence - AI Integration & Workflow Automation - Post-mortems, system reliability	- Executive Business Review - Dashboard Health Monitoring - Looker, Databricks, Redshift, Athena, Jupyter, Snowflake, BigQuery, ELK/Kibana (monitoring & observability) - ETL & Data Pipelines - Platform Integrations - Workflow automation & oversight	- Python, SQL* - AWS (Solutions Architect) - Claude, Vercel, LLM, prompt engineering & agent skills - SDK & API Design - Anthropic Claude skills, custom agents - Data Engineering tools - Software testing

KEY ROLES

SMITH LABS

New York | 2024 - 2026

- AI-native product studio; building, deploying and operating impactful software
- Built [ReserveMap](#), [Living Resume](#), proprietary investment trading agent; Caring senior family members (NJ)

AMAZON WEB SERVICES (AWS)

Seattle & New York | 2022 – 2024

Technical Business Developer • Private Pricing Operations (*Ran the approvals platform behind AWS's largest enterprise deals.*)

- Owned AWS's Approvals platform serving 400+ strategic account leaders to process \$6B+ in enterprise deals. Served as sole product owner, SRE, and data-pipeline operator sustaining uptime, incident response, onboarding, and updates.
- Defined the metrics and built the standardized dashboards and reporting behind executive Monthly Business Reviews (MBRs), driving visibility for senior leadership, adapting forms and validation logic as AWS services evolved.

Deal Structurer, Strategic Customer Engagement (Negotiations & Growth Strategy)

- Structured and negotiated complex renewals averaging \$225M per engagement, delivering 14% above-target growth across finance, travel, and technology verticals. Secured pricing incentives and advocacy for strategic accounts.
- Modeled multi-service deals aligning customer workloads with priorities across Sales, Product, Finance, and Legal.
- Led Early Renewals Analysis identifying structural growth opportunities, unlocking 24% projected first-year uplift through data-driven policy recommendations. Optimized for long-term partnership value and retention.

TRIPLELIFT (Native programmatic ad exchange; acquired \$1.4B)

New York | 2019-2020

Senior Solutions Engineer, Supply-Side & Mobile

- Led end-to-end **\$3M product launch** for mobile at Triplelift, validating the ~\$45M TAM opportunity, developing rollout strategy, modeling revenue impact, and orchestrated pilot implementation across partners within one quarter.
- Defined and executed mobile supply integration strategy, aligning demand-side growth goals with engineering feasibility and platform stability, owning and strengthening Google and Amazon supply partnerships.
- Designed reporting infrastructure and IAB compliance validation to scale mobile inventory onboarding.
- Unlocked **\$4M liquidity** through strategic roadmap considerations, code-based experiments and QBR negotiations.
- Technical hands-on development including Python crawler, Java adapters, and Databricks SQL and Snowflake query.

EDUCATION

STANFORD UNIVERSITY

Palo Alto | 2012

B.S., Symbolic Systems, Human-Computer Interaction and Learning

EMORY UNIVERSITY, GOIZUETA BUSINESS SCHOOL

Atlanta | 2022

M.B.A., Concentration in Entrepreneurship, Product Management & Venture Capital

EARLY CAREER

NIELSEN MARKETING CLOUD

New York, NY | 2017 – 2018

Data Solutions Lead

- Architected omnichannel data integrations for enterprise brands (Walmart, Chobani, IPG), achieving **300M+ MAU growth** surpassing platform expansion goal metrics.
- Owned Business Intelligence for global account teams, reducing data discrepancies below 5% and recouping **24% of lost revenue**, while synthesizing feature requests and serving as SCRUMmaster for go-live ETL pipeline
- Partnered with eng and data science to launch In-Flight Analytics, distilling client needs into scalable data workflows.

CLEVER (Sequoia)

San Francisco, CA | 2016 – 2017

Partner Engineer

- Led technical strategy for **200+ EdTech application integrations** across a platform serving 60,000+ U.S. schools.
- Drove full legacy API deprecation initiative, aligning engineering, external developers, and partnering with our CTO the Events API, 30M events/day, achieving 100% client migration and **\$1.4M infrastructure annual savings**.
- Served as escalation lead during peak “Back-to-School”, safeguarding platform reliability across high-volume traffic.
- Owned developer experience, leading documentation and onboarding refactor improving ecosystem scalability.

KAHUNA (Sequoia)

Palo Alto, CA | 2014 – 2016

Sr. Solutions Engineer (Product & Platform)

- Joined Series A–B stage mobile marketing startup and led enterprise SDK/API integrations across 50+ brands (NYT, Yelp, Yahoo!, Weather Channel), supporting **200M+ MAU**.
- Partnered directly with CTOs, Product, and Engineering leaders in executive client sessions to negotiate integration strategy, align technical constraints, and shape roadmap priorities.
- Conducted structured product discovery (e.g., Tumblr need-finding sessions) to translate real-world marketing use cases into scalable SDK architecture and event-stream design, rolling out Kahuna Intelligent Attributes.
- Authored functional specifications and developer-facing documentation for customer-driven feature releases (Adaptive Campaign API, Push-All-Devices, Intelligent Attributes)
- Designed staged rollouts for high-volume clients to balance SDK enrichment with performance and scalable infra.
- Delivered **125% net revenue retention** and generated **\$2M net new ARR (33% of total)** in 2015.

MICROSOFT

Redmond, WA | 2012–2013

Program Manager, Windows 8.1 (Audio & Natural User Interface)

- Authored cross-platform API convergence initiative aligning Windows, Windows Phone, and Surface audio platform teams to unify session and volume behavior across form factors.
- Led functional specification and investigation for next-generation volume and Natural User Interface improvements in Windows 8.1, addressing top customer-reported issues and reconciling Desktop/Modern audio models.
- Orchestrated UX testing across touch and touchless devices, coordinating engineering, UX, and OEM stakeholders to ensure platform stability at release scale.
- Explored forward-looking voice and intelligent volume concepts within Windows NUI roadmap, evaluating technical feasibility and developer impact.
